## Mechanics of Composite Materials

is a peer-reviewed international journal that encourages publication of original experimental and theoretical research on the mechanical properties of composite materials and their constituents including, but not limited to:

- damage, failure, fatigue, and long-term strength;
- methods of optimum design of materials and structures;
- prediction of long-term properties and aging problems;
- nondestructive testing;
- mechanical aspects of technology;
- mechanics of nanocomposites;
- mechanics of biocomposites;
- composites in aerospace and wind-power engineering;
- composites in civil engineering and infrastructure
- and other composites applications.

The Journal, founded by the Latvian Academy of Science in 1965, is issued at the University of Latvia, Riga, and Springer Science + Business Media, Inc (USA).

**Editor-in-Chief: A. Čate (Čate) (Latvia)**
